

IN MEMORY OF

Professor STOYAN DANEV

Dear Colleagues,

It is with profound sadness that we share the news that Prof. Stoyan Danev passed away on December 14th 2022.

It is not easy to describe, in just a few sentences, the extraordinary human and scientific personality of Prof. Danev. He was the loving father and honorable member of BCLF, a distinguished former Chairman of the Department of Clinical Laboratory at Medical University of Sofia and President of BSCL.

He remains with us as a fusion of intellect, aristocracy and unattainable professional and academic heights. He left an indelible mark on the professional and personal lives of all of us and his absence arouses a deep sense of emptiness.

We miss him greatly.
